

**When you need an ARC/MMA welder suited to heavy duty work you there is only one serious choice – the MMA160S**

This great machine is perfect for ship building, heavy fabrication and other specialist arc applications thanks to its 4mm electrode capacity.

Also featuring an LED display to enable accurate calibration

You can even start TIG welding by using the optional scratch start torch kit complete with regulator – just plug and go!

The MMA160S requires a 240v 26A supply

Our complete package includes a 3M Earth Lead & MMA Lead, Mains Cable and Owners Manual
