

# EU20i

## 2000W Portable Generator

### Super quiet operation

Revolutionary technology and sound proofed casing keep operational noise to just 52dB(a) at 7m at ¼ load, that of a typical business office.

### Pure power

Honda's unique Inverter technology produces a maximum 2000W (1600W rated) of clean and smooth power, essential for powering computers or other sensitive electronic equipment and enough to power a microwave oven.

### Superb efficiency

Unique Ecothrottle® runs only as fast as the load demands, improving fuel consumption and extending engine life with up to 10 hrs running time on a single tank at ¼ load.

### Lightweight and compact

Weighing just 21kg, making it easy to carry, transport and store.

### Spill-free refuelling

Extra wide filler cap for easy filling.

### Dual AC sockets

Power or recharge two products simultaneously.

### DC output

12V 8A output for recharging batteries.

### Parallel operation

Two units can be linked to provide a maximum 3600W, 3200W rated output (optional cables available).

### Sturdy platform

Rubberised feet minimise vibration and movement.

Delivering 2000 watts of portable power, the EU20i is the ultimate leisure generator for the more demanding user. This tough and compact unit is powerful enough for all kinds of tasks where you don't have access to the mains – whether you're abroad in the caravan or motorhome, working at the end of the garden, entertaining outdoors or even to provide emergency back-up when there's the inevitable power cut.
