

# WB20

## 2 Inch General Purpose Water Pump

### Durable yet lightweight

High quality tubular steel frame and aluminium pump housing ensure easy portability with long life.

### OHV 4-stroke engine

Powerful and efficient with trusted reliability. Easy starting in all conditions with automatic decompression to reduce the pull-force needed.

### Oil Alert®

Prevents engine damage by automatically shutting the unit down if the oil drops below a safe operating level.

### Anti-vibration platform

Rubber engine mounts minimise vibration and extend the frame life.

### Quick-release couplers

Quick and simple to install the hoses with no tools necessary.

### Cast iron volute and impeller

Superior durability for long life performance, even when pumping abrasive silts and sand.

### Excellent performance

With a maximum output of 600 litres per minute and a pressure of 3.1 bars the WB20 is ideal for moving large amounts of water, fast.

Whether it's site water containing silt and sand or plain freshwater, the WB20 pump is ideal for shifting it fast. Its premium performance and durability comes from the pairing of Honda's GX industrial grade OHV 4-stroke engine with a high quality abrasion resistant cast iron volute and impeller. These tried and tested units are mounted on vibration-reducing rubber dampers to ensure smoother running and extended frame life.
